65 KINKEL ST. WESTBURY N.Y. 11590 • 516 333 3770

operating and maintenance instructions

MODEL B-120
UNIFLEX BASSAMP

CONGRATULATIONS: You are now the owner of the finest amplifier made. It has been designed and handcrafted to give you many years of high quality, trouble free performance.

Please read and return the warranty card for validation of your warranty.

Read the operating instructions.

Talk to your authorized OLIVER dealer. His knowledge and experience can be helpful to you.

OPERATING INSTRUCTIONS:

POWER LINE CONNECTION: The power cord is stored in the amplifier chassis compartment. Connect the plug to any convenient outlet 105/117 volt 50/60 cycle.

POWER SWITCH: Move toggle switch to the on position and allow a few moments for warm up. Pilot light will indicate that power is on.

INPUT JACKS: Model B-120 has two, isolated input jacks. Plug instrument into one. The unused jack can be used as an auxiliary for another instrument if needed.

VOLUME CONTROL: Turn clockwise to increase volume of sound.

STONE CONTROLS: These controls are specialized volume controls which enable you to set the response of the high range, mid range, and low range in any combination.

THE FOLLOWING PROCEDURE IS RECOMMENDED IN SETTING UP YOUR AMPLIFIER.

Turn volume and tone controls of your instrument (not the amplifier) at maximum output. These may be readjusted after your amplifier controls are set. Set the amplifier volume control at half way point. Set the amplifier bass, mid-range and treble controls at the half way point. Set the ultra-high and ultra-bass controls at the extreme counter clockwise position. For a brighter sound increase the treble control. If you reach maximum and still wish more brightness increase the Ultra-High control. For more bass increase the bass control. If you reach maximum and still wish more bass increase the Ultra-Bass control.

Experimentation will help you determine the final settings of the amplifier to give you the sound you want.

The Mid-Range control causes the greatest change in effective volume and adds more punch to the output of most instruments.

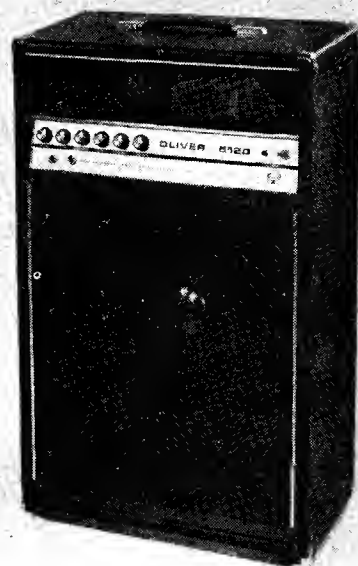

CARE AND MAINTENANCE

Your OLIVER amplifier is engineered and built to exacting standards. Should your amplifier require service, we suggest you check with your authorized OLIVER dealer for the address of the nearest OLIVER service center.

Sometimes line disturbances may cause an objectionable hum. To eliminate this simply reverse the power cord plug in the outlet.

FUSE: REPLACE FUSE WITH 3 AMP FUSE ONLY.

The case covering may be cleaned with any mild soap, detergent or vinyl cleaner. A lustrous finish may be added by using any available vinyl wax.

maintenance instructions

UNIFLEX GUITAR AMP

MODEL G-150R
MODEL G-200R

CONGRATULATIONS: You are now the owner of the finest amplifier made. It has been designed and handcrafted to give you many years of high quality, trouble free performance.

Please read and return the warranty card for validation of your warranty.

Read the operating instructions.

Talk to your authorized OLIVER dealer. His knowledge and experience can be helpful to you.

OPERATING INSTRUCTIONS:

POWER LINE CONNECTION: The power cord is stored in the amplifier chassis compartment. Connect the plug to any convenient outlet 105/117 volts 50/60 cycle. (Export models use proper line voltage as indicated)

POWER SWITCH: Move toggle switch to the on position and allow a few moments for warm up. Pilot light will indicate that power is on.

ANTI-HUM: Sometimes line disturbances may cause an objectionable hum. To eliminate this, simply flip the Anti-Hum switch.

CHANNELS: This model has two channels. Channel one incorporates additional effects, tremolo and reverberation, and channel two is the "straight" channel. Select desired channel.

INPUT JACKS: Each channel has two isolated input jacks. Plug instrument into one. The unused jack can be used as an auxiliary for another instrument if needed.

VOLUME CONTROL: Turn clockwise to increase volume of sound.

TOE CONTROLS: These controls are specialized volume controls which enable you to set the response of the high range, mid range, and low range in any combination.

TREMOLO AND REVERB: If you wish to use these effects you must plug into channel one. For tremolo, set the speed and intensity controls to the desired level. For reverb, adjust the reverb control. For remote control of these effects, you may use a double foot switch with a standard two circuit phone plug. (Oliver Model FS 2 foot switch). The jack to accommodate this is located on the rear of the chassis.

THE FOLLOWING PROCEDURE IS RECOMMENDED IN SETTING UP YOUR AMPLIFIER.

Turn volume and tone controls of your instrument (not the amplifier) at maximum output. These may be readjusted after your amplifier controls are set. Set the amplifier volume control at half way point. Set the amplifier bass, mid-range and treble controls at the half way point. Set the ultra-high control at the extreme counter clockwise position. For a brighter sound increase the treble control. If you reach maximum and still wish more brightness increase the Ultra-high control if you are using channel one. Experimentation will help you determine the final settings of the amplifier to give you the sound you want.

CARE AND MAINTENANCE:

Your OLIVER amplifier is engineered and built to exacting standards; however, should your amplifier require service we suggest you check with your authorized OLIVER dealer for the address of the nearest OLIVER service center.

FUSE: REPLACE FUSE WITH 3 AMP FUSE ONLY.

The case covering may be cleaned with any mild soap, detergent or vinyl cleaner. A lustrous finish may be added by using any available vinyl wax.

OLIVER SOUND warrants its products for the lifetime of the original purchaser against defects in material and workmanship. This specifically excludes broken tubes, and loudspeakers with torn or ruptured diaphragms. The obligations of OLIVER SOUND under this warranty are limited to the replacement of material required to replace or repair any part, which under normal usage and service, upon examination by OLIVER SOUND shows evidence of defect. This warranty does not extend or apply to any unit which has been repaired or altered by persons not expressly approved by OLIVER SOUND, nor to any unit the serial number of which has been altered defaced or removed. This warranty is in lieu of all other warranties, expressed or implied, and no other representatives or persons are authorized to assume for OLIVER SOUND any other liability in connection with the sale or use of such products or parts thereof. The warranty extends only to the original consumer purchaser and is not assignable or transferable. OLIVER SOUND shall not be liable for any consequential damage or expense directly or indirectly arising from the use of the product or any inability to use it either separately or in combination with other equipment or product accessories. See warranty card.

**LIFETIME
GUARANTEE**

"I'm getting Revolutionary Vibrations with my **OLIVER ELECTRO-VIBE PICK-UP**"

says **GARY BURTON** Atlantic Recording Star

New OLIVER ELECTRO-VIBE PICK-UP* with Volume Control and Standard Output Jack.

Available for most popular brand vibraphones. Specify make and model number, when ordering.

PRICE (All Models) \$450.00

Here's how...

- Projects vibraphone sound at any level without acoustic or magnetic feed-back
- Virtually transforms vibraphone into a new instrument, can be used with Fuzz, Wah-wah, Tremolo and Vibrato effects.
- May be used with or without resonator tubes
- Increases projection and versatility
- Does not affect instrument's acoustic properties, when played unamplified
- Unlimited volume performance with far less effort
- Use of lighter mallets with less force opens the way for improved articulation

*Patent Pending

SPECIAL VIBRAPHONE AMPLIFIERS

Customized especially for the Vibraphone. Similar to models G400R and G400RA, except single speaker versions. Detachable dolly included.

G300R Price \$499.00

Available with Altec Speaker

Accessories: Heavy Duty black vinyl covers.

G300RA Price \$620.00

Head: \$5.00. Speaker Enclosure: \$10.00

OLIVER PA-100 SERIES
